TABLAS DE CAMBIO

PARA CONVERTIR

Marcos, Francos, Liras, Pesetas, etc.

EN MONEDA CORRIENTE

Con cambio de 0.50 á 250 como el valor de $ 1.00 papel con respecto á los marcos, francos, liras, pesetas etc. es decir de 5 15|16 d. á 29 11|16 d. para los marcos y de 4 13|16 d. á 24 1|16 d. para los francos, liras y pesetas

Modo de usar las tablas

Si se leen con cuidado las explicaciones para usar la tabla de conversión de pesos papel á moneda inglesa, se entenderá mejor el uso de esta tabla, que está sujeta á las mismas leyes que aquella tabla.

Varias veces le han preguntado al autor de estas tablas que dónde se halla en ellas el cambio para los marcos, los francos, etc. y la respuesta ha sido: **Las tablas sirven para todas esas monedas porque si un Banco dice que el cambio sobre Alemania está á 0.89 se busca el cambio 0.89 y se procede con la tabla correspondiente; pero si en el mismo día le dicen que el cambio está sobre Francia á 1.10½ se buscará en la tabla el cambio á 1.10½ y así sucesivamente para las liras y pesetas.**

La manera de usar estas tablas es la siguiente:

Si deseamos saber lo que nos costará una letra sobre Hamburgo por 2 985.45 Marcos cuando el cambio esté á 0.81½, primeramente nos fijaremos en que este número de Marcos se puede descomponer en

2 000 Mr.+900 Mr.+80 Mr.+5 Mr.+0.4 Mr.+0.05 Mr.

y como en la tabla de cambio á 0.81½ vemos que

2	marcos	valen	$ 2.45398773
2 000	marcos	valdrán	2 453.98773

es decir, 1 000 veces más que 2 marcos; pues ya se sabe que para multiplicar un número decimal por 1 000, basta correr la coma tres lugares á la derecha.

Del mismo modo, según la tabla respectiva de cambio de $ 0.81½,

9	marcos	valen	$ 11.042944785
y 900	marcos	valdrán	1104.2944785

es decir, 100 veces más.

Resulta, pues, que para saber lo que valen 2 985,45 marcos al cambio de 0.81½, el problema se desarrollaría así, por una serie de razonamientos análogos, usando tres decimales en cada caso, para mayor exactitud:

2 000	marcos	valen	$ 2 453.987
900	”	”	1 104.294
80	”	”	98.159
5	”	”	6.134
0.4	”	”	0.490
0.05	”	”	0.061
2 985.45	”	”	$ 3 663.125

Nótese que cuando se trata de decimales se supone corrida la coma decimal un lugar á la izquierda si se trata de décimas y dos lugares á la izquierda si se trata de centésimas.

Luego 2 985,45 Mr.=$ 3 663,12½.

Procediendo por división de 2 985,45 por 0,815 nos habría dado un resultado de $ 3 663,12 8|10; pero el mismo resultado habríamos obtenido con la tabla tomando 4 decimales en cada caso. Sin embargo, no vale la pena de tomar más de 3 decimales, y aún bastaría tomar dos decimales, con tal de agregar 1 al segundo, si el tercero llegase á 5.

El mismo procedimiento se sigue cuando se da el cambio en francos, liras, etc., pues aunque el valor intrínseco de estas monedas es diferente que el de los marcos, el cambio se da siempre en proporción de su valor.

Pongamos un ejemplo:

2 565.55 pesetas al cambio de 1.07½

Buscaremos en estas tablas el cambio á 1.07½ y veremos que

Pesetas	2 000	=	$ 1 860,465	En el N.o 2
	500	=	465,116	” ” 5
	60	=	55,814	” ” 6
	5	=	4,651	” ” 5
	0,5	=	0,465	” ” 5
	0,05	=	0,046	” ” 5
Pesetas	2 565,55	=	$ 2 386,557	= $ 2 386,56

4 777,77 francos al cambio de 1,05½

Buscamos en las tablas el cambio á 1,05½ y veremos que

Francos	4 000	=	$ 3 791,469
	7000	=	663,507
	70	=	66,351
	7	=	6,635
	0,7	=	0,664
	0,07	=	0,066
Francos	4 777,77	=	$ 4 528,692

Nótese que en cada caso tomamos tres cifras de la tabla para decimales, pero cuando la 4.a cifra llega ó pasa de 5 aumentamos 1 á la 3.a cifra.

Reducción de pesos papel á pesos oro de 18 peniques, y vice-versa

Esta misma tabla puede servir para reducir pesos papel á pesos oro de 18 d.

$ 3 500.00 papel ¿cuántos pesos oro son, cuando el precio del oro sea 17 5¼?

Buscamos la tabla 1.75¼ lo que quiere decir que $ 1.00 oro=1.75¼ papel, cuando el premio del oro sea 75¼, y veremos que

Cambio 1,75¼

$ 3 000 papel	=	$ 1 711,840	oro de 18 d.
500 papel	=	285,307	oro de 18 d.
$ 3 500 papel	=	$ 1 997,147	oro de 18 d.

Luego $ 3 500 papel=$1 997.15 oro de 18 d.
$1 997.15 oro de 18 d.×1.7525=$ 3 500 pesos papel

Luego para reducir pesos papel á pesos oro de 18 d., se multiplican los pesos oro por 1 más el premio como decimal.

TABLA DE EQUIVALENCIAS DEL DOLLAR AMERICANO EN PESOS PAPEL CHILENO

en relación con el cambio entre Londres y Nueva York

(Cambios entre Londres y Nueva York a 4.80 y de 4.84 a 4.88¾ por £.)

Esta tabla empieza con cambio de 4.80 sobre Nueva York, lo que supone el dollar de valor de 50 peniques, que es la equivalencia adoptada por los comerciantes é industriales para el avalúo de las facturas de mercaderías norteamericanas.

Las equivalencias se dán hasta por 32 avos en el caso indicado.

Los demás cambios se hallan hasta por 16 avos solamente; pero si se suman dos cambios sucesivos de la tabla y se divide la suma por 2 se tiene el cambio intermedio por 32 avos con cuatro cifras decimales exactas.

Algunos tendrán dificultad para halllar qué cambios deben sumarse para hallar un cambio intermedio por 32 avos; pero en la tabla de 4.80 pueden hallar un auxiliar, por ejemplo:

Si se busca el valor del dollar cuando el cambio esté en Chile á $9\,^{5}/_{32}$, estando el cambio entre Londres y Nueva York á $4.87\,^{1}/_{4}$, se verá en la tabla de 4.80 que el cambio á $9\,^{5}/_{32}$ está entre los cambios $9\,^{1}/_{8}$ y $9\,^{3}/_{16}$ y estos cambios serán los que sumaré tomándolos de la tabla de $4.87\,^{1}/_{4}$ como se vé en el siguiente ejemplo:

Cambio sobre Nueva York 4.87 ½

Cambio $9\,^{1}/_{8}$;	1 Doll. =	$ 5,397 921
" $9\,^{3}/_{16}$;	1 Doll. =	5,361 200
	Suma	$ 10,759 121
	Mitad =	$ 5,3795 = Cambio $9\,^{5}/_{32}$

Si alcanzamos á imprimir otra edición pondremos los cambios por 32 avos en todos los casos; pero por ahora no tenemos fuerzas ni tiempo para hacer más que lo hecho, que no ha costado poco trabajo.

TABLA PARA REDUCIR DOLLARS A LIBRAS ESTERLINAS CON CAMBIO DE 4.74 DOLLS. A 4.90 POR £

Para usar esta tabla véanse las explicaciones al principio de la **Tabla para reducir pesos papel á moneda inglesa**

Ejemplo:

Reducir 25,000 dollars á £, sh, y d. al cambio de 4.87 ½ doll. por £.

Doll. 20 000 = £ 4 092,072
" 5 000 = 1 023,018
Doll. 25 000 = £ 5 115,090

Los 20,000 Doll. se han buscado en la equivalencia de los 2 Doll. de la tabla corriendo la coma 4 lugares. Los 5 000 Doll. se han buscado en la equivalencia de los 2 Doll. de la tabla, corriendo la coma 3 lugares (tantos como ceros).

En 90 milésimas hay 9 centésimas que divididas por 5 = 1 chelín y sobran 4 centésimas = 40 milésimas. Como 40 es mayor de 24 se rebaja 1 y quedan 39 milésimas que divididas por 4 = 9 ¾ d, (peniques.)

REGLA: Dividiendo las centésimas por 5 salen los chelines; dividiendo las milésimas por 4 salen los peniques, pero en este caso se rebaja antes 1 de las milésimas, cuando éstas pasan de 24. (Siguiendo esta regla nunca llegará el error á ¼ de penique).

Otros ejemplos:

Reducir 3 956.78 Dollars á £, sh, y d. con cambio á 4.87 ¾ Doll. por £.

Doll. 3 000	= £	615,069	(En los 3 Doll. de la tabla)
900	=	184,521	(" 9 " ")
50	=	10,251	(" 5 " ")
6	=	1,230	(" 6 " ")
0.7	=	0,143	(" 7 " ")
0.08	=	0,016	(" 8 " ")

Doll. 3956.78 = £ 811,230 = £ 811—4 s. 7 ¼ d.

Reducir 24 000 Dollars á £, sh, y d, al cambio de 4.77 ½ Doll. por £.

20 000 = £ 4188,482
4 000 = 837,696
Doll. 24 000 = 5026,178 = 5026—3—6 ¾
