MAP OF CHILE BY REGIONS

GENERAL BACKGROUND (A)

LOCATION AND EXTENSION:

Chile is located in the southwest of South America stretching as far south in the Antarctica as to the South Pole itself and with its westernmost province, Easter Island, in the South Pacific Ocean.

On the American continent, Chile stretches from parallel 17°30' S. at the northern boundary to parallel 56°32' S. at the southernmost tip of South America.

The Chilean Antarctic Territory comprises the whole of the area located Southwards from the 60° S., between meridians 53° and 90° W. as far as the South Pole at 90° S.

The national territory comprises several islands in the Pacific Ocean, which add to the country's territorial waters. The nearest to the continent are the islands that form the Juan Fernández archipelago, San Félix and San Ambrosio. The most distant from mainland are Sala y Gómez and Easter Island or Rapa Nui.

The latter is located at 27° S. and 109°30' W., opposite the port of Caldera and 3.760 kilometers away from mainland.

From the Concordia line to the South Pole, the country is over 8.000 kilometers long. The area of South American, Antarctic and Oceanic Chile is 2.006.626 square kilometers, with 756.626 sq. km corresponding to South American and insular Chile and 1.250.000 sq. km to the Chilean Antarctic Territory.

SOUTH AMERICAN AND INSULAR CHILE	756.626 sq. km
Cropland	16.560 sq. km
Grazing land	129.300 sq. km
Forest land	84.200 sq. km
Non-productive land	526.566 sq. km
CHILEAN ANTARCTIC TERRITORY	1.250.000 sq. km
TOTAL	2.006.626 sq. km

BOUNDARIES

Chile is bounded on the north by Perú, by a border line known as "Línea de la Concordia"; on the east by Bolivia and Argentina, mainly by a line that runs through the highest summits of the Andes; on the south by the South Pole, and on the west by the Pacific Ocean, including 200 nautical miles of territorial waters.

CLIMATE AND NATURAL RESOURCES :

The North:

Climate: Desert.

Natural resources: Nitrate, copper, iron, lithium and other minerals, valleys suited for agriculture, sea foods.

The Center:

Climate: Mild and temperate, with rains in winter.

Natural resources: Agricultural lands especially suitable for fruitgrowing, grazing lands, forests, hydroelectric power (rivers), copper, coal, sea foods.

The South:

Climate: Temperate and rainy.

Natural resources: Agricultural and grazing lands, forests, hydroelectric power (rivers), coal, sea foods.

The Far South:

Climate: Cold steppe.

Natural resources: Forests, petroleum, natural gas, coal, limestone, sheep, sea foods.

TEMPERATURE, RAINFALL AND ENVIRONMENTAL POLLUTION: (A) (B) (C)

POPULATION

GENERAL BACKGROUND:

According to past censuses, in 1835, Chile had a population of 1,010,332; in 1895, 2,687,985; in 1907, 3,220,531; in 1940, 5,023,539; in 1960, 7,374,115; in 1970, 8,884,768; in 1982, 11,329,736; and in the latest census, of 1992, 13,348,401. The estimated population as at June 30, 1995 is 14,237,275 inhabitants.

This steady growth of the population is mainly due, on the one hand, to moderately high birth rates (until 1962, the birth rate was 37.5 in a thousand, on average) and a decreasing mortality rate, and on the other hand, to an increasingly longer life expectancy (from 67.2 years in 1975 to 72.2 years in 1979 and to 74.4 years in the period 1990 - 95).

In recent years, the population has a higher proportion of elderly people since the birth rate has dropped to around 2.2% a year, while overall mortality is 0.6%. This brings population growth to 1.7% a year.

Until 1930, the population was predominantly rural: in 1875, 65.1% and in 1920, 53.6%. The 1940 census reversed the situation and in 1982 only 17.8% of the population was rural and according to the latest census of 1992 it was only 16.5%.

The population density is currently 17.6 inhabitants per square kilometer, one of the lowest density figures in Latin America. However, it should be remembered that over 70% of Chilean territory is desert, mountainous or otherwise inhospitable for human settlement.

SYSTEM OF GOVERNMENT AND POLITICAL AND ADMINISTRATIVE ORGANISATION

According to the political Constitution of 1980, Chile is a unitarian state. For interior administration and government, the country is divided into regions and these into provinces. For local administration, the provinces are divided into communes.

Regional government is the responsibility of the Intendent, who is the immediate representative of the President of the Republic and is answerable directly to him.

At the head of the region administration is the Regional Government with full legal capacity and its own assets. It consists of the Intendent, its maximum authority, and the Regional Council which has normative, resolute and supervisory capacities.

Provincial government corresponds to the Governor, also answerable directly to the President of the Republic and subordinate to the Intendent. He administers in representation of the Intendent and is assisted by a consultative Provincial Social and Economic Council of which he is the Chairman and he may also constitute a Technical Advisory Committee.

Local communal administration is carried out by the Municipality, an autonomous public body with full legal capacity and its own assets. It consists of the Mayor and his Council with normative, resolute and supervisory capacities. At the same time, each commune has a Communal Social and Economic Council, chaired by the Mayor, which has consultative duties. The Mayor is both councillor and chairman of the Council and, like the other councillors, is elected by public vote. The councillor that obtains the first majority is elected Mayor, if his list or pact gets at least 30% of the votes.

Most of the Ministries and National Public Services are decentralised territorially by way of Ministerial Regional Secretariats and Regional or Provincial Directions respectively, the latter being subordinate to the Ministerial Regional Secretariat and both subordinate to the Intendent.

Furthermore, in each region there is a Regional Cabinet to assist the Intendent integrated by Governors, Ministerial Regional Secretaries and by regional heads of state administration nominated by the Intendent.

THE REGIONS AND THEIR CAPITALS:

Decree Law 575 (July 10, 1974), divided the Chilean territory into thirteen regions:

NAME	CAPITAL
I Region of Tarapacá	Iquique
II Region of Antofagasta	Antofagasta
III Region of Atacama	Copiapó
IV Region of Coquimbo	La Serena
V Region of Valparaíso	Valparaíso
VI Region of Libertador General Bernardo O'Higgins	Rancagua
VII Region of Maule	Talca
VIII Region of Biobío	Concepción
IX Region of La Araucanía	Temuco
X Region of Los Lagos	Puerto Montt
XI Region Aisén del Gral. Carlos Ibáñez del Campo	Coihaique
XII Region of Magallanes y de La Antártica Chilena	Punta Arenas
Santiago Metropolitan Region	Santiago

Regions with largest population:

Santiago Metropolitan Region	5,641,811 inhabitants
V Region of Valparaíso	1,469,148 inhabitants
VIII Region of Biobío	1,830,651 inhabitants

NOTES

- (1) Average rainfall of a 30-year period (1961-1990).
- (2) Data on air pollution provided by the automatic network of the Santiago Metropolitan Service of Environmental Health (SESMA).
- (3) Estimated figures as at June 30th each year, based on the 1992 census.
- (4) Life expectancy at birth is the number of years a newborn infant is expected to live.
- (5) Life expectancy at one year is the number of years a one-year old infant is expected to live.
- (6) All addresses correspond to Santiago unless otherwise stated.
- (7) Including public and private education, and health services.
- (8) Agricultural year "n" is understood to mean the period elapsed since sowing took place in year "n-1" until harvest takes place in year "n".
- (9) Output and yield figures are not available for 1994 and 1995, because the National Bureau of Statistics (INE) is preparing a new agricultural and livestock census.
- (10) Including production of dried, salted, smoked, agar-agar, and colagar products.
- (11) Including cement, concentrates, slags and ores.
- (12) Including regular and special gasoline. From 1992, includes unleaded gasoline.
- (13) Including domestic and aviation kerosene.
- (14) Refers to a group of 73 one-storey dwellings of 69.80 square meters each.
- (15) Information referring to the private sector corresponds to approved construction permits. Information referring to the public sector corresponds to construction already under way.
- (16) The increase from 2,373 to 7,460 is due to the fact that the Codelco Tocopilla company became a publicly available service.
- (17) Including ordinary gas, blast-furnace gas, natural gas, methanol and biogas.
- (18) Including private cars, hired cars and taxis, station wagons and ambulances.
- (19) Including pickup trucks, trucks and vans.
- (20) Including motor-scooters, motor-cycles, tractors, and other motorised vehicles.
- (21) Including letters, printed matter and parcels.
- (22) December to December change.
- (23) Statistics on purchases and sales subject to Value Added Tax (VAT).
- (24) The deflator used is the Wholesale-Price Index of USA.
- (25) Mean annual import price cif according to specified place of origin.
- (26) Information on banks under dissolution is excluded.
- (27) Interest rates on indexed transactions correspond to the geometric average of the annual rates for each period, and the non-indexed ones refer to the cumulative value of the monthly rates for each year.
- (28) The new presentation considers imports at their fob value thus implying changes in nonfinancial services figures. It considers as reserves only those of the Banco Central. Short-term capital flows of the banking system are therefore not recorded as variation in reserves but as "other capital, banking sector". Figures on reserve

holdings consider gold at its market price. The new presentation makes a distinction between the changes in holdings of reserves and the change in reserves due to balance of payments transactions. Therefore, the change in holdings is adjusted, when necessary, by: monetisation or demonetisation of gold, allocation or payment of SDRs and valuation changes.

- (29) Excluding the Banco del Estado which comes under the Banking System.
- (30) According to the International Monetary Fund Handbook on Balance of Payments, exports must be registered at the time goods change hands and not when they pass through customs. Since the statistics of export shipments given herein are taken from customs declarations they must be adjusted to come more in line with the Handbook definition. The most important adjustment is the replacement of copper and molybdenum shipments by their sales abroad.
- (31) Data on registered imports are gathered from importers' declarations legally recorded by the National Customs Service. Hence, those imports not subject to a customs declaration (postal remittances, simplified procedures, legal exceptions, duty free areas) are not included, but they do conform to the balance of payments concept of imports. In addition, crude oil customs declarations are replaced by purchases abroad effected by the National Petroleum Company (ENAP).
- (32) Applications made each year according to DL 600 of October 1974 and DL 1748 of March 1977 and the amendments there to effected by laws 18.065, 18.474, 18.682, 18.840 and 18.904 published in the Official Gazette on Dec.10.1981, Nov.30.1985, Dec.31.1987, Oct.10.1989, and Jan.25.1990 respectively.
- (33) Since April 1993, the National Bureau of Statistics replaced the General Earnings Index by the Hourly Wages Index and the Hourly Labor Cost Index. Consequently, the annual average for 1993 corresponds to the 9 months April through December.
- (34) Figures correspond to the quarterly moving average of each year.
- (35) Including scientific-humanistic and technical-professional education.
- (36) Including medical attention under the system of national health services. (SNSS).
- (37) Corresponds to the daily average of programmed food rations. It includes municipal contracts. 1995 only gives information on the regular programme whereas preceding years included the contracts programme.
- (38) Corresponds to primary school food programme for children aged 6-14.
- (39) Corresponds to the Schoolchildren's Home Programme, consisting of four meals a day.
- (*) Provisional figures.
- (n.d.) Information not available.

SYMBOLS

C:	Currency in circulation.
D'1:	Deposits in private-sector nonfinancial current accounts.
Float:	Deposits of documents of other banks.
D1:	(D'1 - float) Deposits in private-sector nonfinancial current accounts net of float.
Dv:	Other demand deposits of the nonfinancial private sector, not included in current accounts.
Ahv:	Demand savings deposits in the financial system.
Dp:	Time deposits in the private sector.
Ahp:	Time savings deposits in the financial system including those for housing.
D2:	Total financial quasi-money (public and private).
D2p:	Private financial quasi-money.
Dg:	Public-sector demand deposits net of float of the Treasury banking account.
E:	Monetary base.
M1:	Private sector money (C + D1).
M1A:	M1 + Dv + Ahv.
M2:	M1 + Dp.
M2A:	M1A + Dp.
M3:	M1 + D2p.
M3A:	M1 + Dg + D2.
M4:	M3 + publicly held instruments of the Banco Central de Chile.
M5:	M4 + publicly held Treasury promissory notes.
M6:	M5 + publicly held credit bills.
M7:	M6 + private sector foreign currency deposits.
