MAP OF CHILE BY REGIONS

GENERAL BACKGROUND (A)

LOCATION, AREA AND EXTENSION

Chile is located in the south west part of South America stretching as far south in Antarctica as the South Pole with Easter Island, in the South Pacific, to the west of mainland Chile.

On the American continent, Chile stretches from parallel 17° 30' South latitude in the north boundary to parallel 56° 32' South latitude in the southern part of South America.

The Chilean Antarctic territory comprises the whole of the area located between meridians 53° and 90° west longitude as far as the South Pole at minus 90°.

The national territory comprises several islands in the Pacific Ocean, which add to the country's territorial sea. The nearest to the continent are the islands that form the Juan Fernández archipelago and San Félix and San Ambrosio. The most distant from the mainland are Sala and Gómez, and Easter Island, also known as Rapa Nui.

The latter is located at 27° latitude South and 109° 30' longitude West, opposite the port of Caldera and 3,760 kilometers away from the mainland.

From the Concordia Line to the South Pole, the country is over 8,000 kilometers long. The area of Continental, Antarctic and Oceanic Chile is 2,006,626 square kilometers, with 756,626 sq. km. corresponding to Continental Chile and 1,250,000 sq. km. to the Chilean Antarctic Territory.

CONTINENTAL CHILE	756,626 sq. km.
Agricultural lands	16,560 sq. km.
Grazing lands	129,300 sq. km.
Forest lands	84,200 sq. km.
Non-productive land	526,566 sq. km.
CHILEAN ANTARCTIC TERRITORY	1,250,000 sq. km.
TOTAL	2,006,626 sq. km.

BOUNDARIES:

Chile is bounded on the North by Perú, by a border line known as "Línea de la Concordia"; on the East by Bolivia and Argentina, mainly by a line that runs through the highest summits of the Andes; on the South by the South Pole, and on the West by the Pacific Ocean, including 200 nautical miles of territorial waters.

CLIMATE AND NATURAL RESOURCES:

The North:

Climate: Desert.

Natural resources: Nitrate, copper, iron and other minerals, valleys suited for agriculture, sea foods.

The Center:

Climate: Mild and temperate, with rains in winter.

Natural resources: Agricultural and grazing lands, forests, hydroelectric power (rivers), copper, coal, sea foods.

The South:

Climate: Temperate and rainy.

Natural resources: Agricultural and grazing lands, forests, hydroelectric power (rivers), copper, coal, sea foods.

The Austral Region:

Climate: Steppe, cold.

Natural resources: Forests, petroleum, natural gas, sheep, sea foods.

POPULATION

GENERAL BACKGROUND:

According to different censuses, Chile had 1,103,036 inhabitants in 1835 and 2,695,625 inhabitants in 1895. In 1907, there were 3,231,022 inhabitants, which rose to 5,023,539 in 1940 and 7,663,171 in 1960.

The census taken in 1970 showed a figure of 9,339,665 inhabitants and the latest census, of April 1982, calculated the country's population at 11,329,736 inhabitants.

At present, according to projections made by the Statistical National Institute, the population in 1987 is of 12,536,374 persons.

This sustained growth can be mainly attributed to the persistence, until 1962 of moderately high birth rates (37.5⁰/oo as an average) and to the decline in the mortality rate, which resulted in an increase in average life-span of the Chilean from a level of 65.7 years in 1975 to 66.7 years in 1979 and 71.5 years in 1987.

In the last years, the Chilean population has been undergoing a slow process of aging due to a rapid drop in the fertility rate. At present, the birth rate fluctuates at about 2.2% per year and the general mortality rate at 0.6%, with a vegetative growth of 1.7% per year.

Rural population prevailed up to 1940. Until 1875, it corresponded to 73% and in 1920 to 54%. As from the 1952, this situation was reversed: the 1982 census showed that the rural population accounted for 17.8% of the total population. Estimated figures for 1987 point out that the rural population reaches a mere 14.0%.

At present, Chile has a population density of 16 inhabitants per square kilometre, which is one of the lowest figures in Latin America. This is due to the fact that over 70% of the continental territory is desert, mountain or possesses some other kind of geographical feature that makes it unsuitable for human settlements.

GOVERNMENT SYSTEM: POLITICAL AND ADMINISTRATIVE ORGANIZATION

According to the 1980 Constitution, Chile is a unitarian state. For administrative and interior government purposes, the country is divided into regions, and these, into provinces. For the purpose of local administration, the provinces are subdivided into communes.

The regional, provincial and communal government systems are hierarchically structured. At the head of each region's administration is the intendant, who is in charge of directing and administrating the Region, and is advised by a Regional Council of Development and a Regional Secretariat of Planning and Coordination.

The government and administration of each province are in charge of a Governor, who is subordinated to the Regional Intendant whom he represents. He is assisted by an Advisory Technical Committee and by a Provincial Council.

In charge of communal government is the Mayor, assisted by a Communal Council of Development and by a Communal Secretariat of Planning and Coordination.

The basis of the system is the commune, since it is there that organized participation of the community takes place. Within the system, the Ministries act in a decentralized way by means of Regional Ministerial Secretariats.

THE REGIONS AND THEIR CAPITALS

Therefore, short term capital flows of the banking system are recorded not as variation of reserves, but as other capital, banking sector. The figure on holdings of international reserves considers gold value on the basis of its market price. This modified statement makes a distinction between the change in holdings of reserves, and the change in reserves due to balance of payments transactions. Therefore, the change in holdings is adjusted, if necessary, by: Monetization/demonetization of gold, allocation/cancellation of SDR's, and valuation changes.

- (29) It includes capital flows of development banks since the year 1979.
